### **DETAILED ACTION**

1. Regarding the status of the claims in the instant application, the Examiner has made an updated search and found new prior art. The examiner is obliged to apply the newly found prior art. Thus, the finality of the prior office action has been withdrawn and a new rejection follows. The Examiner regrets the delayed process of the application. Accordingly, claims 1-19 are pending.

### ***Allowable Subject Matter***

2. Claims 1-18 are allowed over the prior art of record.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 19 is rejected under 35 USC 102 (e) as being anticipated by **Stefik et al US 2004/0107166 A1.**

As per claim 19, Stefik discloses a system for associating usage rights with digital content the system comprising:

A digital rights clearinghouse that records transactions, an archive coupled to the clearinghouse that automatically backs up content represented by the transactions at the time the content was first purchased, and a plurality of computers coupled to the clearinghouse and the archive that acquire digital rights to the managed content (see., abstract, pages 2-3, page 4, [0046] clearinghouse 303, and page 20, [0281], specifically archive printer).
